

UnInstallation guide of PostgreSQL and pgadmin for windows

To uninstall PostgreSQL and pgAdmin on a Windows system, you can follow these general steps. Keep in mind that specific steps might vary depending on the version you have installed

Uninstall PostgreSQL:

Control Panel:

- Open the Control Panel on your Windows system.
- Navigate to "Programs" or "Programs and Features."

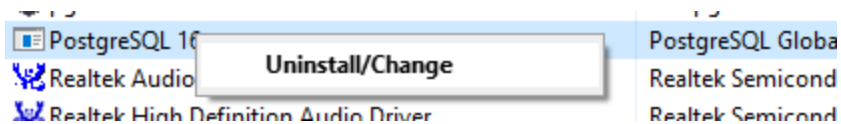

Find PostgreSQL:

- Look for PostgreSQL in the list of installed programs.

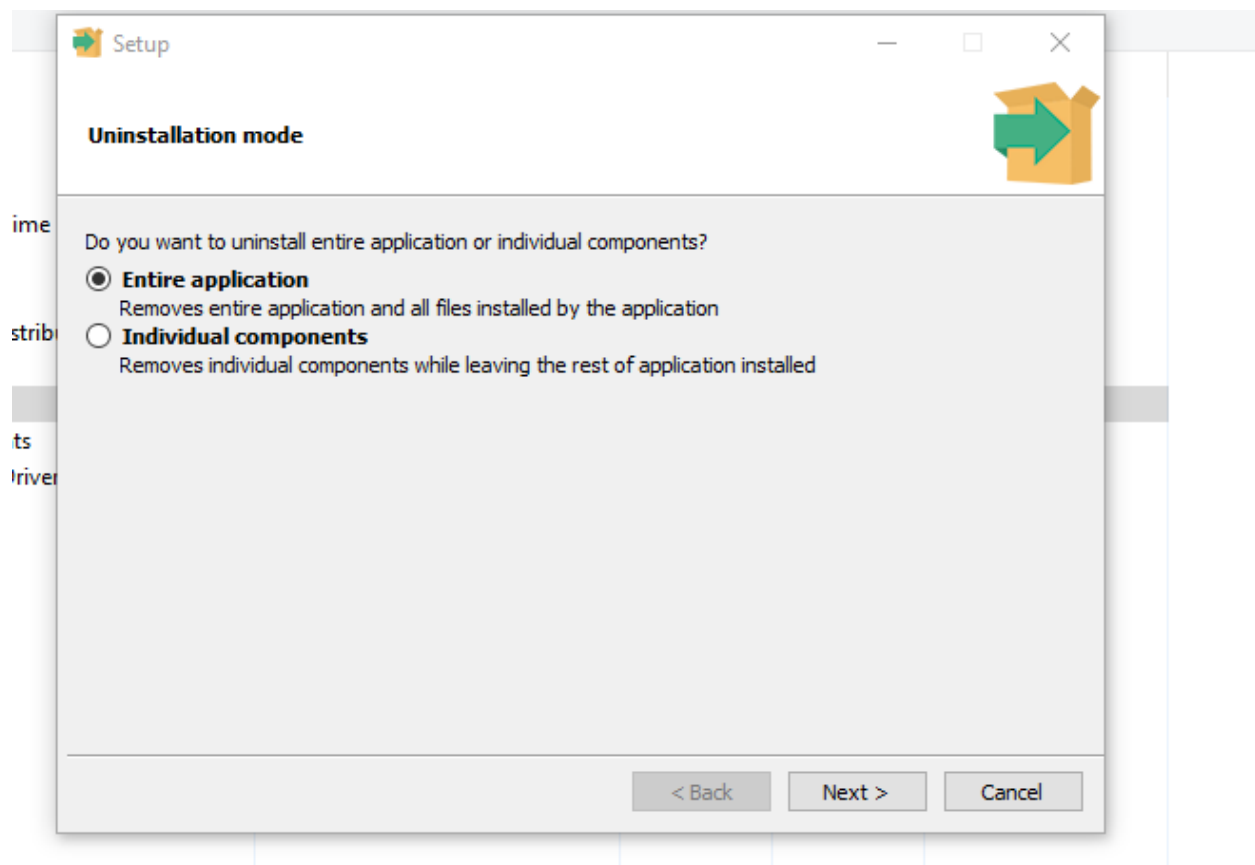

Uninstall PostgreSQL:

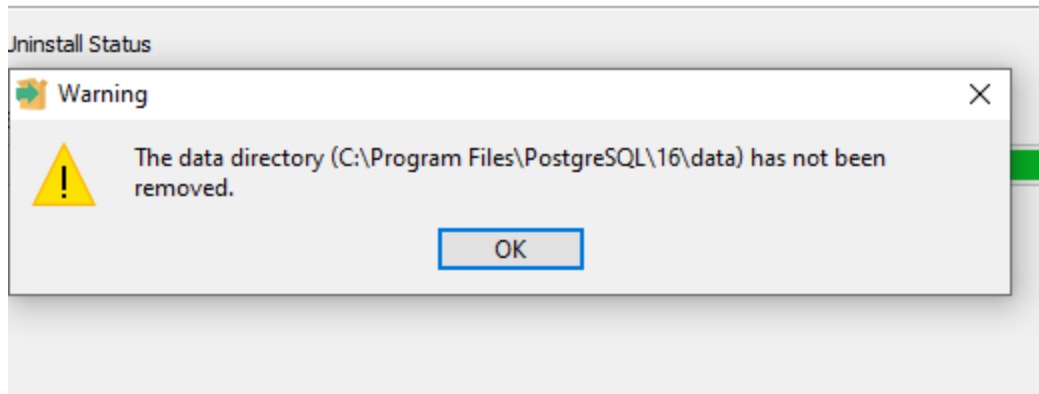

- Select PostgreSQL from the list.
- Click on the "Uninstall" or "Change/Uninstall" option.

Complete Uninstallation:

- Wait for the uninstallation process to complete.

To ensure a thorough uninstallation and avoid potential issues, follow the steps below to completely remove PostgreSQL and pgAdmin from your computer.

Remove PostgreSQL Data Directory:

After uninstalling PostgreSQL, you may also want to remove the data directory:

Data Directory Location:

- The PostgreSQL data directory is usually located at `C:\Program Files\PostgreSQL\<version>\data` or `C:\Program Files (x86)\PostgreSQL\<version>\data`.

Delete Data Directory:

- Manually delete the PostgreSQL data directory to remove any remaining files.

File folder

Uninstall pgAdmin:

Control Panel:

- Open the Control Panel on your Windows system.
- Navigate to "Programs" or "Programs and Features."

Find pgAdmin:

- Look for pgAdmin in the list of installed programs.

Uninstall pgAdmin:

- Select pgAdmin from the list.
- Click on the "Uninstall" or "Change/Uninstall" option.

Follow the Wizard:

- Follow the uninstall wizard instructions.

Complete Uninstallation:

- Wait for the uninstallation process to complete.

Remove Remaining Files:

Program Files:

- Check the installation directory (usually `C:\Program Files\pgAdmin` or `C:\Program Files (x86)\pgAdmin`) for any remaining files and delete them.

AppData:

- Navigate to the AppData directory (`C:\Users\<username>\AppData\Roaming\pgAdmin`) and delete any remaining pgAdmin files or folders.

Select "Yes" when prompted during the uninstallation process to ensure the complete removal of pgAdmin from your computer.
